TITLE: PROTECTION FILM FOR BASE SHEET

THE COMMISSIONER FOR PATENTS  
P.O. Box 1450  
Alexandria, VA 22313-1450

**AMENDED CLAIMS**

1. (currently amended) A protection film for a base sheet of a lens sheet having a lens surface formed of a UV-curable resin layer, the protection film comprising:  
a resin film; and  
an adhesive on one side of said resin film, said adhesive being separable together with said protection film from said base sheet;  
wherein a transmittance of ultraviolet rays, having a wavelength of 320 nm, through the protection film is 82% or more.
2. (original) A protection film for a base sheet according to claim 1, wherein an adhesive strength is from 0.4 to 2.3 N / 25 mm.
3. (cancelled)
4. (previously presented) A protection film for a base sheet according to claim 1 wherein the adhesive contains a polyolefin-based resin component.
5. (original) A protection film for a base sheet according to claim 1, wherein the material of the base sheet is an acrylic resin.
6. (currently amended) A lens sheet comprising:  
a base sheet; and  
a protection film comprising:  
an adhesive formed on one side of said resin film, said adhesive being separable together with said protection film from said base sheet;  
wherein a transmittance of ultraviolet rays, having a wavelength of 320 nm, through the protection film is 82% or more.

7. (previously amended) A lens sheet according to claim 6, wherein the protection film is pasted from the side of the adhesive, a surface of the base sheet has coated thereon an antistatic agent containing a cationic surface active agent, and the base sheet has a surface resistivity after one year from production of  $10^{12} \Omega$  /  $\square$  or less.
